(II) RISK MANAGEMENT

Credit Risk

Credit risk is the risk of economic loss incurred by the Company and its subsidiaries resulting from the inability of debtors of the Company and its subsidiaries to make any principal or interest payments when due. The assets of the Company and its subsidiaries which are subject to credit risk are principally concentrated on insurance receivables, reinsurance assets, debt securities and deposits with commercial banks.

The Company and its subsidiaries are only committed to credit sales to corporate customers or individual customers who purchase certain insurance policies through insurance intermediaries. The capability to collect premiums in a timely manner remains one of the key performance indicators of the Company. The Company's premiums receivable involves a large number of diversified customers, therefore there are no major credit concentration risks in insurance receivables.

Other than the state-owned reinsurance companies, the Company and its subsidiaries purchase reinsurance primarily from reinsurance companies with A- rating or above by Standard & Poor's (or equivalent ratings granted by other international rating agencies such as A.M. Best, Fitch and Moody's). The management of the Company and its subsidiaries regularly review the creditworthiness of the reinsurance companies in order to update the reinsurance strategies and determine reasonable impairment provision on reinsurance assets of the Company and its subsidiaries.

The Company and its subsidiaries diligently manage credit risk in debt securities mainly by analysing the creditworthiness of investee companies prior to making investments and by strictly conforming to the relevant regulations issued by the CBIRC on the investment ratings of corporate bonds. The majority of the bonds held by the Company and its subsidiaries have credit ratings of AA or above.

The Company and its subsidiaries manage and lower credit risk affecting their bank deposits mainly by depositing most of their deposits with state-owned banks or state-controlled commercial banks.

Exchange Rate Risk

The Company and its subsidiaries conduct their business primarily in RMB, which is also their functional and financial reporting currency. Certain businesses of the Company and its subsidiaries (including certain commercial property insurance, international cargo insurance and aviation insurance business) are conducted in foreign currencies (primarily in US dollars). The Company and its subsidiaries are also exposed to exchange rate risks for assets which are valued based on foreign currencies such as parts of their bank deposits and debt securities and certain insurance business liabilities which are denominated in foreign currencies (primarily in US dollars).

Foreign exchange transactions under the capital accounts of the Company and its subsidiaries are subject to foreign exchange control and the approval of the administration authority for foreign exchange. Exchange rate fluctuations may arise as a result of the foreign exchange policy adopted by the PRC government.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market interest rates. The Company and its subsidiaries' interest rate risk policy requires to manage interest rate risk by maintaining an appropriate match of fixed and floating interest rate instruments. The policy also requires to manage the maturity of interest-bearing financial assets and interest-bearing financial liabilities, reprice interest on floating rate instruments at intervals of less than one year and manage floating interest rate risk through interest rate swap and other instruments. Interest on fixed interest rate instruments is priced at inception of the financial instrument and is fixed until maturity.

Interest Rate Swaps

The Company and its subsidiaries' financial assets which bear interest at different rates would generate uncertain cash flows. As such, interest rate swap contracts are used by the Company and its subsidiaries to hedge against such interest rate risk whereby fixed interests are received from, and floating interests are paid to, the counterparties.

(III) OTHER SPECIFIC ANALYSES

While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, the Company and its subsidiaries believe that any liabilities resulted therefrom will not have a material adverse effect on the financial position or operating results of the Company and its subsidiaries.

As of 30 June 2021, there were certain pending legal proceedings of the Company and its subsidiaries. Report on Review of Interim Financial Information

To the Board of Directors of PICC Property and Casualty Company Limited

(Incorporated in the People's Republic of China with limited liability)

INTRODUCTION

We have reviewed the interim financial information set out on page 34 to 79, which comprises the interim condensed consolidated statement of financial position of PICC Property and Casualty Company Limited (the "Company") and its subsidiaries (together, the "Group") as at 30 June 2021 and the interim condensed consolidated income statement, the interim condensed consolidated statement of comprehensive income, the interim condensed consolidated statement of changes in equity and the interim condensed consolidated statement of cash flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and Hong Kong Accounting Standard 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants. The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with Hong Kong Accounting Standard 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on this interim financial information based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information of the Group is not prepared, in all material respects, in accordance with Hong Kong Accounting Standard 34 "Interim Financial Reporting".

- (i) The income approach determining the fair value at the evaluation point by discounting the target properties' rental income derived from existing lease agreements and the potential rental income projected by reference to the current market rental status, at an appropriate capitalisation rate; or
- (ii) The direct comparison approach comparing the target properties with the recent similar transaction cases, adjusting the difference of status, date, region and other specific factors between the target properties and the recent similar transaction cases, based on the recent similar transaction price.

For financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1	inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
Level 2	inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
Level 3	inputs are unobservable inputs for the asset or liability.

33. RELATED PARTY TRANSACTIONS *(continued)*

(c) Transactions with other government-related entities in the PRC

The Company is a state-owned enterprise which is subject to the indirect control of the State Council of the PRC government. The Group operates in an economic environment predominated by enterprises directly or indirectly controlled, jointly controlled or significantly influenced by the government through its authorities, affiliates or other organisations (collectively the “government-related entities”).

Transactions with other government-related entities include insurance policies sold, reinsurance purchased, deposits placed with banks, investments in debts or bonds and commissions paid to banks for insurance policies distributed.

The directors consider that transactions with government-related entities are activities conducted in the ordinary course of business, and that the dealings of the Group have not been significantly or unduly affected by the fact that the Group and those government-related entities are ultimately controlled or owned by the PRC government. The Group has also established pricing policies for products and services and such pricing policies do not depend on whether or not the customers are government-related entities.

Due to the complex ownership structure, the PRC government may hold indirect interests in many companies. Some of these interests may, in themselves or when combined with other indirect interests, be controlling interests which may not be known to the Group.

(d) Key management personnel

Key management personnel are those persons having authorities and responsibilities for planning, directing and controlling the activities of the Group, directly or indirectly, including directors, supervisors and other members of senior management.

No transactions have been entered with the key management personnel for the six months ended 30 June 2021 other than the emoluments paid to them (being the key management personnel compensation).

There had been no significant change in the activities of the Group and the Company since then that requires reassessment. The Group and the Company have decided to apply the temporary exemption in its reporting period commencing on 1 January 2018.

As permitted by Amendments to HKFRS 4, the Group elects not to apply uniform accounting policies when using the equity method for Hua Xia Bank. Except for Hua Xia Bank, the Group has applied uniform accounting policies accounting for subsidiaries, other associates and joint ventures in the interim condensed consolidated financial information.
